

Oral Session: Papers to1 – to4

(Chairperson:
Chris Ling, University of Sydney)

Craig Buckley, Curtin University

Power generation in remote areas using concentrated solar thermal and hydrogen
(INVITED)

Paul Mignone, University of Melbourne

A novel multi-scale modelling approach for determining the bulk properties of difficult-to-characterise composites

Elvis Shoko, ANSTO

Molecular dynamics simulation and experimental inelastic neutron scattering: a marriage in atomic dynamics

Marcus Doherty, ANU

The search for optically addressable single spins in the solid state: lessons learnt from the NV colour centre in diamond
